

International Association for Cryptologic Research (IACR)

Copyright and Consent Form

Version 2.1 – 2016 September 18

Sign Part I, and one of Part II or Part III.

To ensure uniformity of treatment among all contributors, other forms may not be substituted for this form, nor may any wording of the form be changed or any parts be added unless explicit written permission is obtained from the President of the IACR for such changes. This form is intended for original material submitted to the IACR and must accompany any such material in order to be published by the IACR. Please read the form carefully and keep a copy for your files.

For questions and special requests, please contact copyright@iacr.org.

IACR Policy on Copyrights, Publications and Presentations

In connection with its publishing activities, it is the policy of the International Association for Cryptologic Research (hereinafter referred to as "IACR") to own the copyrights to all copyrightable material in its technical publications and to the individual contributions contained therein, in order to promote research in Cryptology, to protect the interests of the IACR, its authors and their employers, and, at the same time, to facilitate the appropriate archiving and distribution of this material by others. The IACR is committed to making this material widely available at the lowest possible cost. The IACR currently contracts with a commercial publisher (currently: Springer-Verlag) to distribute its technical publications throughout the world, using various means such as traditional paper printing, Internet distribution, and computer storage media. The IACR may also abstract and translate its publications, or parts of them, for inclusion in various compendiums and similar publications, etc. When material is submitted to the IACR for publication, the authors implicitly consent that the IACR has the rights to do all of these things.

In addition to material in technical publications, the IACR also intends to distribute the presentation slides, video and/or audio recordings from talks and additional supporting material (such as data sets and software tools). For this purpose, the IACR requests the permission from the authors to do so in Part I. Following a decision in August 2016, granting permission to distribute this material is mandatory. Until the policy to record all presentations is firmly established, it applies only to those events that already state it in the respective call for papers. Authors or presenters can request to be excluded from recording their presentations in justified cases; to request an exception they should contact the President of the IACR as stated in the opening paragraph.

IACR Policy on Public Dissemination

This policy applies to all material submitted to the IACR: The IACR must of necessity assume that material presented at its meetings or submitted to its publications is properly available for general dissemination to the world. It is the responsibility of the authors, not the IACR, to determine whether disclosure of their material requires the prior consent of other parties and, if so, to obtain it. The authors should also guarantee that their material does not contain libelous statements. Furthermore, if authors use within their article material that has been previously published and/or is copyrighted by another party, the IACR must assume that permission has been obtained for such use and that any required credit lines, copyright notices, etc., are duly noted.

Availability of Material in Technical Publications

Publisher version. This is the definitive version of an article that is stored by the publisher in his digital library that is accessible to all IACR members and to paying subscribers to the library. Four years after publication, the article will be freely available in this library. Other versions of the article can be made available as described below.

IACR version. This is the version that the authors submit to the program chair for the final version of the proceedings. The IACR version can be made freely available on the homepages of authors, on their employer's institutional page, and in non-commercial archival repositories such as the Cryptology ePrint Archive, ArXiv/CoRR, HAL, etc. Authors are strongly encouraged to upload the IACR version immediately in the Cryptology ePrint Archive (<http://eprint.iacr.org>). This version must contain a footnote on the first page:

"© IACR <year>. This article is the final version submitted by the author(s) to the IACR and to Springer-Verlag on <date>. The version published by Springer-Verlag is available at <DOI>."

Here <year> is the year of publication, <date> is the date on which the final version has been submitted to the program chair and <DOI> is the Digital Object Identifier that is assigned by the publisher (if the DOI is not yet known, a placeholder can be inserted and updated as soon as the DOI is available). In the case of severe formatting deviations between the IACR version and the publisher version in the proceedings (e.g. changed page breaks or total number of pages), the typesetting of the IACR version may be modified to mimic the publisher version. If authors fail to upload the IACR version of an article to the Cryptology ePrint Archive, the IACR can do this on behalf of the authors. Two years after publication, the IACR will make the IACR version of the article available in the IACR Archive.

Subsequent revisions. If authors make minor revisions (less than 25% new content) to an article, the IACR copyright still applies and the following copyright notice must be inserted as a footnote on the first page:

"© IACR <year>. This article is a minor revision of the version published by Springer-Verlag available at <DOI>."

For major revisions it is recommended that the following reference to the original version is inserted:

"This article is based on an earlier article: <bibliographic data>, © IACR <year>, <DOI>."

IACR Obligations

In exercising its rights under this agreement, the IACR will make all reasonable efforts to act in the interests of the authors and employers as well as in its own interest. In handling third-party republication requests for material whose copyright is held by the IACR, the IACR requires that 1) the consent of the first-named author be sought as a condition in granting republication (of a complete article) to others; and 2) the consent of the employer be obtained as a condition in granting permission to others to reuse all or portions of an article for promotion or marketing purposes.

Author/Company Rights

If an author is employed and prepared an article as a part of her/his job, the rights to the material may rest initially with the employer. In that case, when authors sign this form, the IACR assumes that the signing authors are authorized to do so by their employers and that their employers have consented to all the terms and conditions of this form. If not, it should be signed by someone so authorized. (See also the Public Dissemination policy above.)

Structure of this Form

This form consists of three parts:

- Part I Consent and Release, to be completed by all authors
- Part II Copyright, to be completed by non-government employees
- Part III Declaration for Government Employees, to be completed by government employees

Joint Authorship

For jointly authored works, all the joint authors should sign, or one of the authors should sign as an authorized agent for the others.

In the case of multiple authorship where one or more authors are government employees but at least one author is not, the non-government author should sign Part II of this form.

Copyright and Consent Form

Submission-ID: _____

Title of article (hereinafter referred to as "the Work"):

Name of publication (i.e. conference or workshop name and year):

Author(s):

Name and address of corresponding author:

PART I Consent and Release

Following a decision in August 2016, authors must give the permission to distribute the presentation slides and the recording of the oral presentation. Until this policy is firmly established, it applies only to those events that already state it in the respective call for papers. In exceptional cases authors or presenters can request to be excluded from recording their presentations; as stated in the opening paragraph, they should contact the President of the IACR for this.

□ Presentation Slides

The undersigned hereby grants permission for the IACR to distribute, publish, exhibit, broadcast, reproduce and archive, in any format or medium, whether now known or hereafter developed, the presentation slides used during the presentation of the Work at an IACR event.

□ Oral Presentation

The undersigned hereby grants permission for the IACR to record, digitize, distribute, publish, exhibit, broadcast, reproduce and archive, in any format or medium, whether now known or hereafter developed, the oral presentation of the Work at the event. The permission granted includes the transcription and reproduction of the presentation for subsequent distribution and live or recorded broadcast of the presentation in complete or partial form during or after the event.

□ Auxiliary Material

Auxiliary Material is defined as additional files, including software and executables, that are not submitted for review and publication as an integral part of the Work, but are supplied and made available by the authors as useful resources for the reader.

The undersigned hereby grants the IACR permission to distribute, publish, exhibit, broadcast, reproduce and archive any Auxiliary Material supplied together with the Work. The undersigned hereby represents and warrants that his/her Auxiliary Material contains no malicious code, virus, trojan horse or other software routines or hardware components designed to permit unauthorized access or to disable, erase or otherwise harm any computer systems or software, and hereby agrees to indemnify and hold harmless IACR from all liability, losses, damages, penalties, claims, actions, costs and expenses (including reasonable legal expense) arising from the use of such files.

PART II Copyright

To be completed by non-government employees. Government employees whose work is not subject to U.S. copyright should certify this by signing Part III below.

The undersigned hereby assigns all copyright rights in and to the Work to the IACR. The undersigned hereby represents and warrants that the Work has not heretofore been published in whole or in part, and that he/she is the author of the Work, except possibly for material such as illustrations, tables, animations, and text quotations that clearly identify the original source, with written permission notices from the copyright owners where required. The undersigned represents that the Work contains no libelous statements and does not infringe on any copyright, trademark, patent, statutory rights or proprietary rights of others, including rights obtained through licenses. The undersigned represents that he/she has the power and authority to make and execute this assignment.

In return for these rights, the IACR recognizes the retained rights noted in Items 1, 4, 5, 7, and 8 below, and grants to the above authors and employers for whom the Work may have been performed a royalty-free license to use the material as noted in Items 2, 3, 4, 5, 6, and 7. Item 9 stipulates that authors and employers must seek permission to republish in cases not covered by Items 2, 3, 4, 5, 6, 7 and 8.

1. Authors (or their employers) retain all proprietary rights in any process, procedure, or article of manufacture described in the Work.

2. Authors may self-archive and make available the version of the Work submitted to the conference or workshop for the final version of the proceedings (the "IACR version"), on their personal websites, on their employer's websites, and in non-commercial archival repositories subject to the restriction that it should contain at the bottom of the title page a footnote with the following copyright notice:

"© IACR <year>. This article is the final version submitted by the author(s) to the IACR and to Springer-Verlag on <date>. The version published by Springer-Verlag is available at <DOI>."

In the case of severe formatting deviations between the IACR version and the Springer-Verlag version in the proceedings, the typesetting of the IACR version may be modified to mimic the Springer-Verlag version.

3. Authors may self-archive and make available the subsequent versions of the Work with minor revisions (less than 25% new content) on their personal websites, on their employer's websites, and in non-commercial archival repositories subject to the restriction that they should contain at the bottom of the title page a footnote with the following copyright notice:

"© IACR <year>. This article is a minor revision of the version published by Springer-Verlag available at <DOI>."

4. Authors retain the right to publish substantially revised versions of the Work (at least 25% new content) in other venues. Such derived works must properly cite the original Work. It is recommended to insert at the bottom of the title page a footnote with the following copyright notice:

"This article is based on an earlier article: <bibliographic data>, © IACR <year>, <DOI>."

5. Authors retain the right to include parts of the Work (e.g. illustrations) in their future work provided that the original Work is cited properly.

6. Authors may include all or part of the Work in their dissertations or doctoral theses provided acknowledgement is given to the original source of publication and subject to the restriction that it should carry a prominent copyright notice to indicate that the copyright for this contribution is held by the IACR. This notice should contain "© IACR <year>, <DOI>." and some text that describes the relation between the Work and the dissertation or doctoral thesis.

7. Authors (or their employers) may reproduce or authorize others to reproduce the Work, material extracted verbatim from the Work, or derivative works for their personal use or for company use provided acknowledgement is given to the original source of publication, the IACR copyright notice is included (in the form "© IACR <year>, <DOI>"), the copies are not used in any way that implies IACR endorsement of a product or service of an employer, and the copies themselves are not offered for sale.

8. In the case of work performed under a U.S. Government contract or grant, the IACR recognizes that the U.S. Government has royalty-free permission to reproduce all or portions of the Work, and to authorize others to do so, for official U.S. Government purposes only, if the contract/grant so requires. (Appropriate documentation may be attached, but either Part II or Part III of this form must be signed.)

9. For all circumstances not covered by Items 2, 3, 4, 5, 6, 7, and 8, authors (or their employers) must request permission from the IACR to reproduce or authorize the reproduction of the Work.

Please note that, although authors are permitted to reuse all or portions of their IACR-copyrighted material in other works, this does not include granting requests to third parties for reprinting, republishing, or other types of re-use. All third-party requests must be handled by the IACR.

In the event the Work is not accepted and published by the IACR or is withdrawn by the authors before acceptance or publication by the IACR, this agreement becomes null and void.

Date (YYYY/MM/DD)

(To be used by everyone except government employees.)

PART III Declaration for Government Employees

To be completed only by government employees.

Authors who are government employees are not required to sign Part II of this form. However, any coauthors outside the government are required to sign Part II of this form, and authors whose work was performed under a government contract or grant, but who are not government employees, are also required to sign Part II of this form (see Joint authorship above).

The undersigned hereby declares that he/she is a government employee and performed this work as part of his/her official duties and that the work is therefore not subject to national or U.S. copyright protection.
